

February '22	March '22	April '22	May '22	June '22	American Tugboat Review '22
<p>AD CLOSE: 12/2/21</p> <p>NAVIGATION ELECTRONICS: The modern bridge hosts an array of electronic navigation systems and monitoring equipment. While the goal is to provide mariners with the information they need to maintain situational awareness and operate safely and efficiently, the flood of data poses dangers of its own — including distraction and information overload.</p>	<p>AD CLOSE: 12/24/21</p> <p>TRAINING & EMPLOYMENT: To be competitive and to take advantage of possible pauses in employment, mariners can advance their career prospects by using high-quality training institutions and technology. We help you anticipate maritime job-growth trends and get yourself prepared for when opportunity knocks.</p>	<p>AD CLOSE: 2/4/22</p> <p>PILOTAGE: Their jobs are among the most demanding in the maritime industry, whether aboard vessels in the realm of brownwater or offshore. We take a closer look at what it takes to become a pilot — East Coast, West Coast, Gulf Coast and inland — and what's needed to move up the career ladder.</p>	<p>AD CLOSE: 3/4/22</p> <p>FIRE SAFETY & TRAINING: Protecting a ship and its crew from fire involves high-quality equipment such as detectors, alarms, automatic fire suppression systems and firefighting gear. Equally vital is the training that teaches the crew how to prevent fires and to use the response equipment effectively.</p>	<p>AD CLOSE: 4/8/22</p> <p>SECURITY VESSELS: Demand for patrol boats and police boats is driving one of the hottest sectors in shipbuilding. U.S. and Canadian yards are responding to increasing concerns about maritime security with new product lines and outfitting for an evolving breed of watercraft.</p>	<p>AD CLOSE: 5/6/22</p> <p>AMERICAN TUGBOAT REVIEW: This annual provides a comprehensive and detailed look at the most important towing vessels coming out of North American shipyards.</p>

Continuing coverage of IT and software solutions, piracy, legal/casualties

August '22	September '22	October '22	American Ship Review '23	December '22	American Mariner Training Directory '23
<p>AD CLOSE: 6/3/22</p> <p>COMMUNICATIONS: Not so long ago, communications at sea was all about safe navigation and conducting ships' business. Now connectivity with family, friends and entertainment is at the center of crew comfort and morale. We provide the information you need to help you choose satellite and wireless systems.</p>	<p>AD CLOSE: 7/8/22</p> <p>VESSEL ACCESS EQUIPMENT: Choosing the right ladders, rails, steps and ramps to access your vessel is essential for mariner safety and operational efficiency. New materials and innovations are providing ways to improve in both areas.</p>	<p>AD CLOSE: 8/5/22</p> <p>GREEN/EFFICIENT SHIPS: Designing a green vessel requires architects and operators to consider new ways of dealing with a wide array of issues, including ballast and bilge water, engine emissions and cleaner fuels — all while maximizing operational efficiency.</p>	<p>AD CLOSE: 9/9/22</p> <p>AMERICAN SHIP REVIEW: This annual edition is comprised of in-depth profiles and specifications of the most significant new-builds: from workboats, research vessels, offshore wind vessels, patrol boats, pilot boats to tankers. This annual helps vessel owners, operators and mariners stay informed and provides analysis of the trends shaping the industry.</p>	<p>AD CLOSE: 10/21/22</p> <p>WORKBOAT SHOW/PROPULSION: From bow thrusters to stern drives to the biggest marine engines, we examine trends in marine propulsion design and development, LNG power and other novel solutions.</p>	<p>AD CLOSE: 10/7/22</p> <p>AMERICAN MARINER TRAINING DIRECTORY: Training is required for licensed mariners, and this new annual issue provides a comprehensive list of training academies and programs for mariners looking to maintain their licenses. Additionally, the issue will feature articles on training trends, including LNG, offshore wind and virtual reality.</p>
